

In order to select your Pioneer adapter:

1. Follow down the vertical column on the left until you find the male tip on your implement line.
 2. Proceed horizontally along this row of adapters until it intersects with the column under the female body on the back of your tractor.
- For example: The proper adapter to hook up an implement with an old style JI Case male tip to a Pioneer style female body would be Pioneer Adapter 4085-4.
